

Introducing Electronic Dabbing Vaporizers at NYCCE:
Experience the Next Level of Concentrate Consumption

We're excited to introduce a new era of vaping at NYCCE with the arrival of **Puffco** – a premium brand renowned for delivering cutting-edge electronic dabbing vaporizers.

Our current lineup includes three exceptional devices tailored to different lifestyles: the **Puffco Peak**, **Proxy**, and **Pivot**.

- **Puffco Pivot** and **Proxy** are perfect for discreet, on-the-go use. Compact, lightweight, and powered by advanced 3D ceramic chambers, these vaporizers heat your concentrates quickly and efficiently – ideal for a smooth, convenient experience wherever you are.
- For those who prefer a more powerful, at-home session, the **Puffco Peak** is your go-to device. Featuring an integrated water filtration system, the Peak delivers cooler, smoother, and more robust clouds. While it's less portable due to its size and weight, it makes up for it with premium performance.

Whether you're looking for convenience or the ultimate home setup, Puffco has a device that fits your needs. Visit NYCCE to elevate your smoking experience today.

For More Detailed Information Read More About The Product Below:

Integrated Heating Chamber:

The Puffco Peak has embedded heating coils in the ceramic walls improving flavor, maximizing vapor production and reduces waste

Real - Time Temperature Control:

Innovative Sensors in chamber regulate heating to maintain consistent temperature. This prevents overheating and ensures consistent flavor profile.

Joystick Carb Cap:

The cap gives you directional control over the airflow in the chamber . It ensures more efficient vaporization and larger clouds

Long Battery Life:

The Puffco Peak provides up to 35 dabs per charge, with an LED light indicating the current battery level

3D Heating Chamber:

3D Ceramic Chamber that vaporizes concentrates from the side walls and gives a more efficient, flavorful and smooth vapor

Real - Time Temperature Control:

Innovative Sensors in chamber regulate heating to maintain consistent temperature. This prevents overheating and ensures consistent flavor profile.

Portability and Discreetness

The Puffco Pivot Pen - Style form is compact, lightweight and discrete making it ideal for travel

Modular Design:

The Proxy has a swappable base that is compatible with a range of Puffco accessories

3D Heating Chamber:

3D Ceramic Chamber that vaporizes concentrates from the side walls and gives a more efficient, flavorful and smooth vapor

Portability:

The kit comes with a durable travel case, making it convenient to carry. However, its classic pipe shape makes it less discreet and pocketable than smaller devices.
